

ActiveEco

ACTIPLUS

SURFACE STAIN REMOVER

ActiveEco ActiPlus is a super-strength, low-odour surfactant degreaser designed for removing tough soil and carbon build-ups.

The high-tech surfactant system contains specially penetrating agents along with a powerful alkali blend providing top cleaning performance on a wide spectrum of soil types.

KEY FEATURES

- Radical cleaning strength
- High-tech specially penetrating agents
- Top cleaning performance on a wide spectrum of soil types
- Easily removes greases, oils, carbon build-ups and automotive soiling
- Low-odour formula
- Highly-concentrated

ACTIPLUS

SURFACE STAIN REMOVER

Applications

ActiveEco ActiPlus is ideally suited as a degreaser and cleaner for use on automotive engines and chassis, heavy equipment, oxidised metals, and resilient flooring.

ActiveEco ActiPlus is excellent in applications such as:

- Mechanics
- Manufacturing
- Mining
- Building cleaning & maintenance
- Aquatic & Sporting Centres
- Plant & equipment maintenance
- Road & Rail
- Aviation
- Marine
- Farm equipment & buildings

ActiveEco ActiPlus is excellent for chemically polishing oxidised metals and painted surfaces and restoring them to 'as new' condition. This includes items such as stainless-steel tanks, machinery, and building fixtures.

The solution is also great for use in commercial floor scrubbers to clean and degrease heavy grime from floors and streetscapes.
