

# Triple7 Odour Control

**A powerful organic deodoriser and cleaner that destroys odours at their source**

**Triple7 Odour Control** is a readily biodegradable, non-toxic and non-corrosive plant based product designed for eliminating odour. The product is free of ferric salts, magnesium chloride and typical chemical derivatives, enabling odour problems to be solved without hazardous additives. **Triple7 Odour Control** is suitable for gas-scrubbing in hazardous environments and does not react with other chemicals (eg: Chlorine) to create toxic gases. The science of odours is complicated. Odours are caused by ash particles, fatty globules, gases, solvents, proteins, caustics, pheromones and fragrances, or a combination of these factors. Odours are affected by oxidisers, sunlight and chemical reactions in the air, in our blood and sensory receptors. **Triple7 Odour Control** reduces odours by attaching to light aromatics, gases, flavonoids and other odour-causing substances. The product has an oxidising effect and works to convert Hydrogen Sulphide to harmless peroxide compounds.

**Triple7 Odour Control** also contains a highly concentrated surfactant solution that separates solids or soiling material within effluent and other odour-plagued environments. In these situations, problems with smell arise when healthy bacteria start to die. **Triple7 Odour Control** breaks down the solids to provide a food source for the bacteria, improving and enhancing biodegradability.

## Physical Properties (typical chemical data – actual may vary)

<b>Colour:</b>	Very light amber	<b>Odour:</b>	Mild surfactant odour
<b>Kauri Butinal Value (KB):</b>	n/a	<b>pH:</b>	9.0-9.9
<b>Viscosity:</b>	n/a	<b>Specific Gravity:</b>	1.00
<b>Vapour Pressure:</b>	n/a	<b>Evaporation Rate:</b>	n/a
<b>Boiling Point:</b>	100°C	<b>Flash Point:</b>	n/a
<b>Safety:</b>	Non-Hazardous	<b>Soluble with water:</b>	Miscible

## BENEFITS

**Protects your health** – no toxic vapours or risk of chemical burns or explosion.

**Protects the environment** – no ozone depleting chemicals or toxic off-gassing.

**Saves money** – highly concentrated and only a minimum amount of product required

**Reduces storage requirements** – Product goes is a concentrate and reduces inventory purchase requirements and consequent storage space

## HOW TO USE

Triple7 Odour Control cleans surfaces as well as destroying odours and can be used for water treatment, refuse, low water-use toilets, general cleaning, effluent and marine tank applications.

**Toilets & Basins** – Spray a 5% solution of Triple7 Odour Control onto surface, leave for 5 minutes and rinse clean with water.

Scrub to remove hardened build-up and reapply if necessary.

**Showers** – Spray with 10% Triple7 Odour Control, let stand and scrub if necessary.

**Floors** – Mop with a 2% to 5% solution of Triple7 Odour Control and water. (Too strong a solution will make floors sticky.)

**Laundry** – Add 250mL of Triple7 Odour Control to a wash to remove latent odours.

**Garbage Bins & Compactors** – wash empty bins with a 5% solution of Triple7 Odour Control. For prevention, spray inside bins with a 10% solution.

**Toys & Playground Equipment** – Spray and wipe with a 5% solution of Triple7 Odour Control

**Carpet & Upholstery** – Remove as much contaminant as possible and then spray the area with a 5% dilution of Triple7 Odour Control. Stand 10 minutes then pat dry until all residual odours stop. For steam cleaning, use Triple7 Odour Control at 1%. Spot clean first, using a 10% solution, then steam clean the entire area. Do not use more than 1% to prevent re-soiling.

## SAFETY

- Not classified as dangerous according to the Australian Dangerous Goods code for transport.
- Non-Hazardous according to the criteria of NOHSC and Worksafe Australia.
- Observe all safety recommendations made on the product label, collateral and SDS.
