

# REJUVENATOR

ALKALINE MAINTENANCE CLEANER FOR HARD SURFACES

## Non-Detergent Hard Surface Maintenance Cleaner

**ActiveEco Rejuvenator** is a highly effective surface cleaner designed for regular use that won't cause chemical build-up or damage hard surfaces.

It is suitable for heavy-duty deep cleaning and regular maintenance for a wide range of man-made and natural floor surfaces.

## Powerful Cleaning Action

**ActiveEco Rejuvenator** effectively removes tough build-up and stains like oil, fat, rubber abrasion, grime, detergent residue, and lime scale residues.

The smart technology cleans deeply without detergents or solvents and leaves no chemical residue, which means tiles and other surfaces retain their original gloss and non-slip properties.

## Benefits

- Micro-splitting technology unlocks deep-set soiling in seconds
- Returns tiles to original gloss
- Maintains surface non-slip properties
- Mildly alkaline non-detergent cleaner
- Will not damage tiles, glazed, glass or natural stone surfaces
- Odourless
- Suitable for use on floor surfaces in food areas

# REJUVENATOR

## ALKALINE MAINTENANCE CLEANER FOR HARD SURFACES

### Suitable for a Range of Surfaces

---

Smart cleaning technology gives **ActiveEco Rejuvenator** the power to cut through grime and build-up without damaging sensitive surfaces.

**ActiveEco Rejuvenator** is safe to use on porcelain, ceramic, artificial stone, natural stone, terrazzo, terracotta, polished concrete, painted concrete, and structured tiles. It is also suitable for delicate materials such as marble and fine stone.

Suitable for use on floor surfaces in food preparation areas.

This product is not suitable for use on vinyl flooring or polymer coated floors and we recommend to always pre-test on every surface before use.

### Deep Cleaning & Ongoing Maintenance

---

**ActiveEco Rejuvenator** is low foam and corrosion-free and is safe for use in all scrubber machines. Remove years of deposits and staining by diluting the product 1:10 to 1:20. For maintenance cleaning, dilute 1:50 to 1:100. Read the label for full usage instructions. After cleaning, rinse well with potable water.

### ActiveEco Cleaning Pad

---

**ActiveEco Rejuvenator** may be applied with a mop, hand scourer, or auto-scrubber.

We recommend combining **ActiveEco Rejuvenator** with the **ActiveEco Cleaning Pad** for results that will amaze you.

### ActiveEco Cleaning System

---

**ActiveEco Rejuvenator** is a maintenance-cleaning agent designed for regular use.

Use **ActiveEco Rejuvenator** in conjunction with periodic applications of **ActiveEco Restore** for deep cleaning to keep floors and tiles looking brand new.
