

BRAKE CLEANER

WORKSAFE HIGH PERFORMANCE BRAKE CLEANER

Put the Brakes on Toxic Fumes

Purasolve Brake Cleaner is a professional grade brake cleaner that is free of the highly toxic chemicals normally found in other brake cleaning products. The high tech formulation delivers stunning cleaning performance and zero residue finish without risking your health.

Breathe Easy

Traditional brake cleaners can be amongst the most toxic and dangerous products you'll find in any workshop. They often contain a mixture of explosive gases combined with solvents that have been linked to health problems such as cancer and nerve damage.

With Purasolve Brake Cleaner you can breathe easy. It is 100% free of dangerous Chlorinated or Halogenated Solvents and does not contain any suspected carcinogens. The n-Hexane free formulation also protects you from long term nerve damage.

Purasolve Brake Cleaner has a low flammability flash point and is pressurised with inert CO₂ gas instead of butane or other toxic, flammable propellants.

No Compromise on Performance

Safer doesn't mean less effective. In fact Purasolve Brake Cleaner delivers superior brake cleaning results with up to 20 times less product than standard brake cleaners.

Purasolve Brake Cleaner is a game changer for workshops around the world. Find out more at envirofluid.com
