

# PS-32P

## Parts Washer & Weapons Cleaner

The **Purasolve PS-32P** is a fully deployable parts washer / weapons cleaner built to meet the rigors of field maintenance operations. This system solves the problem of cleaning maintenance parts and weapons in an environmentally responsible way wherever our Defence Forces are deployed around the world. It utilizes the Purasolve range of environmentally responsible solvents, Purasolve Parts Cleaner, Purasolve Weapons Cleaner and Purasolve Parts Cleaner SK. The unit is designed for high volume usage and requires less solvent for operation making acquisition more cost effective. The **Purasolve PS-32P** utilises a sophisticated micro filtration process that filters down to 0.1 micron and effectively removes oils and greases off the parts/weapons, which are then dissolved in the cleaning solution. Solvent life extension becomes easy, effective and predictable. The **Purasolve PS-32P** is completely self-contained and operable off military maintenance generators in the field or fixed base 240V power.

The **Purasolve PS-32P** is manufactured using heavy duty steel to withstand the punishment of contingency deployment and is specifically designed to be palletized for air, ground or sea deployment. The **Purasolve** solvents are carried internally in air-deployable drums. The machine is finished in a durable flat dark green colour to maintain a “tactical” appearance.

### Benefits

**Easier Maintenance** - Ergonomically designed unit for comfortable, easy cleaning.

**Protects your health** - Reduces toxic off gassing and risks from using dangerous solvents.

**Reduces disposal costs** - Safety solvent filtered and re-used for up to 2 years.

**Reduces through-life costs** - Less toxic waste generated.

**Lifetime Guarantee** - Unit has a lifetime warranty, provided that only purasolve filters and solvents are used in the machine.

The **Purasolve** range of safety solvents are especially designed to eliminate the need for outside rental service and to reduce the ongoing costs of solvent disposal and replenishment caused by waste generation. When used in conjunction with **Purasolve** Parts / Weapons Cleaning Systems, this results in significant savings in through-life costs, along with protecting the health of the user.

The enhanced cleaning properties of **Purasolve Parts Cleaner** together with the exceptional filtering and multiple user-accommodating properties of the dip tank holding the solvent has reduced the time it takes to clean a component or weapon by over 50% (equating to a real-time savings of over two hours per weapon).

## Specifications

**Overall dimensions:** 965mmL x 794mmW x 1080mmH

**Inside tub dimensions:** 813mmL x 559mmW x 457mmH

**Drain basket:** 80mm diameter

**Electrical Requirements:** 240V, 50Hz, 1.7A
