## Removal of Biofouling/ Marine Growth

### Heavy Marine Growth on Heat Exchangers

**The Problem:** There were blockages in the Machinery Space Ventilation Heat Exchangers and when the Heat Exchangers were inspected, the entire system was found to be choked with marine growth.

**The Heat Exchangers were literally blocked solid with marine growth.**

**Product Use:**

Triple7 EnviroScale

NSN: 6850 66 164 0776 (5L)  
6850 66 152 0080 (20L)  
6850 66 152 0081 (200L)

**Procedure:**

Triple7 EnviroScale was flushed through the system to remove the blockages.

**Results:**

The pipework was inspected after the initial flush – Triple7 EnviroScale dissolved the growth and turned it in to a sludge that was being removed from the pipework.
